

1964 Chevrolet C10.358 Small block Chevy/Over-Drive Transmission

Owners are Jason & Brenda Anderson from Perry, IA

1960 through 1998 Chevrolet introduced the 'C/K' series in the United States. With the "C" series indicating a two-wheel drive configuration and the "K" series indicating a four-wheel drive configuration. *The C10 was also the most common pickup: a half-ton truck with 6.5-foot or 8-foot bed and styling remained essentially the same with slight variations until a generation redesign in 1997.*
